

## Environmental Policy

Study Right is committed to the protection of the environment through reducing pollution, emissions and waste.

As part of the induction process, and through staff meetings and training, our staff will be informed about reducing the use of raw materials, supplies and energy.

We raise children's awareness of environmental issues through discussions, projects and day-to-day activities within the centre.

Both children and staff follow the Centre's 'Eco Code':

- We switch off lights when not in use and fit the lights with energy saving bulbs where possible.
- We re-use and recycle our waste material, and the recycling bins are easily accessible to staff and children.
- We turn off electrical equipment at the power source when not in use.
- We turn off taps after use and do not waste water.
- We do not drop litter.
- We plan our outings to minimise vehicle use and use public transport whenever possible.
